

Astronomy Bachelor of Arts

Program Overview

The Department of Physics and Astronomy offers a major directed toward a career in astronomy. Most professional positions in astronomy and astrophysics generally require study leading to the Ph.D. degree. Opportunities include research positions in observatories, often in conjunction with university teaching, and scientific positions in government agencies and industry.

B.A. Degree Requirements

This program allows students to get a degree in Astronomy and also pursue professional career goals (e.g. – journalism, politics, law). The B.A. in Astronomy requires 39 credit hours in the Physics & Astronomy department, and 24 credit hours outside of the department, for a total of 62 credit hours for the degree.

¹ Research Participation: 1 cr (min) of PHY 197 RESEARCH I and/or PHY 198 RESEARCH II at Drake and/or at least one REU (Research Experience for Undergraduates).

² Students who take General Chemistry I at Drake University must take CHEM 001 GENERAL CHEMISTRY I with the lab (CHEM 003 GENERAL CHEMISTRY I LAB), as they are co-requisites. Students should note that

a general chemistry lab is recommended for those pursuing certain pre-professional/career paths.

Grade Requirements for Graduation

2.0 minimum (C) average is required in all physics-credit courses. In addition, a C is required for Modern Physics, Advanced Lab I with Error Theory, Theoretical Mechanics, and Electromagnetic Theory.

In addition to programmatic requirements, students are responsible for satisfying all requirements of the Drake Curriculum (<https://catalog.drake.edu/archive/2024-2025/undergraduate/academic-information/drake-curriculum/>), including Areas of Inquiry (AOI)

Student must also satisfy university graduation requirements (<https://catalog.drake.edu/archive/2024-2025/undergraduate/academic-information/graduation-requirements/>) for all undergraduate students..
