

PSYCHOPHARMACOTHERAPY CERTIFICATE

With an increasing need for mental healthcare, many healthcare professionals are assisting with the treatment of mental health disorders.

An important component of treating mental health disorders is pharmacotherapy but many of the medications are complex and require judicious management. This program addresses a major gap in the delivery of mental healthcare by providing concentrated training on pharmacotherapy medications.

This certificate requires 12 credit hours including 9 credit hours of course work in psychopharmacotherapy and 3 credit hours of elective course work.
