

PHYSICS/ENGINEERING 3+2 WITH WASHINGTON UNIVERSITY

These are dual-degree Drake University majors of the student's choice and engineering programs offered at Washington University. Students interested in Mechanical and Electrical Engineering are strongly recommended to be a Drake physics major due to the supportive and foundational knowledge gained for their engineering interests. However, physics majors can pursue any engineering program at Washington University. Students can pursue undergraduate and/or master's degrees in engineering at Washington University once they are accepted to Washington University's program.

More information on the accelerated track can be found here (<https://catalog.drake.edu/undergraduate/arts-sciences/areas-study/engineering/engineering-dual-degree/>)
