PADM 250. ADMINISTRATIVE EVIL. (3 Credits)

The rancor and turmoil of the last few years underscores the need for a civil public discourse regarding policy and the relationship that our societal organizations (including governments, businesses and not-for-profits) have with citizens. Policy decisions, implementation and the bureaucracy that drives them weave throughout society including for profit and not-for profit entities and governments. In many cases, these policies have unintended consequences that may not be fully realized until they are implemented and in some cases after they have expired. In other cases, the policies themselves are designed to be somewhat obtrusive. This course explores the evolution and implications of public policies and their outcomes - both the intended and unintended.

PADM 280. MANAGING ACROSS SECTOR BOUNDARIES. (3 Credits)

It is now commonly accepted that those elements that once distinguished the public, nonprofit and private sectors have become increasingly blurred. This course examines the resources, processes, techniques and organizational designs associated with conducting the people's business in public and nonprofit organizations and it is based on the learning experiences from the previous course work. The utilization of internal and external resources is a dynamic one and is central to effective management in the third millennium. Managers are presented with a number of real-life cases, problems, and vignettes and are expected to work as a team in resulting complex administrative and policy problems.

PADM 282. COMPARATIVE MANAGEMENT. (3 Credits)

An explanation of basic bureaucratic and administrative theory augmented by the literature of reinvention, reengineering and entrepreneurialism. The course is predicated on the thesis that the public and nonprofit sector can be transformed from traditional organizations that are accountable and budget driven systems to those that are performance driven based, delayed and customer and results driven. Additionally, the course is complemented by focusing on the issues of public policy and management set within a global context where cultural and inter-cultural differences are well documented and heterogeneity and diversity are becoming common themes. Although the distinctive theme of the course will remain intact, the policy and administrative areas delineated for study and examination will vary from course to course. For instance, it might deal with sustainability, technology, reinvention for the nonprofit sector, and multiculturalism; or, crime and corrections, health care delivery systems, zero-emission production, and ecology and environment. This course requires a two-week foreign travel experience.

PADM 283. EXTERNAL RESOURCE DEVELOPMENT. (3 Credits)

Nonprofit organizations have become an increasingly important and essential component of the social fabric that holds together civil society. Funding for these organizations is secured through programming that raises funds through donations and grants from private individuals, government, and for-profit organizations. The course considers effective methods in which external resources can be secured. Emphasized is a mission based, long-term, strategically planned resource development model. Additionally, the course covers tax-exempt laws for nonprofits, ethical concerns associated with cause-related marketing and research, resource management and allocation techniques, financial reporting, and leadership issues.
